About Me

As a systems engineering student at UTN-FRT, nearing the completion of my advanced studies, I am eager to embark on my first professional experience. My goal is to join a dynamic team where I can contribute and further hone my expertise. I am motivated by the prospect of tackling challenges that not only refine my core skills but also foster my growth into a well-rounded IT professional. This motivation is why I am enthusiastic about the possibility of this opportunity.

Key Achievement

- 95% of the degree completed with an average grade of 7.88/10.

Education

- Systems Engineering (In progress) at UTN-FRT.
- Fourth level (B1) of English at ATICANA, December 2021.
- B1 level of French at Alianza Francesa Tucumán, December 2018.
- Currently undergoing training in Data Analytics provided by Telecom, which will soon enhance my proficiency in SQL and SQL Server.

Experience

- Systems Engineering Intern at Cooperativa Telefónica Sta. María LTDA (May 2024 - Present)
 - Currently developing a management system for claims and installations as part of my professional practice for the university. This involves creating both a web system and a mobile application for managing the aforementioned tasks. This project is made using PERN stack (PostgreSQL, Express, React and Node.js).
- Full-Stack Freelance Developer (August 2023 - December 2023)
 - Developed a client registration system for a local gym using web technologies (Django and JS). This project improved my skills in Python and JavaScript and helped the gym enhance its document management by reducing dependence on written records, thereby facilitating tracking of client payments.
- QA Intern at Sovos (July 2022 – January 2023)
 - During my internship, I performed manual testing and learned the basics of automated testing using Cypress. This role also allowed me to get involved with SCRUM methodologies and extensively use tools like Zephyr, GIT, and JIRA. Through this hands-on experience, I gained fundamental knowledge of these technologies and methodologies, which has been instrumental in enhancing my skills and contributing effectively to my team's objectives.

Technical Skills

- Intermediate JavaScript (Vanilla, React, Cypress, Express, Node.js).
- HTML5.
- CSS3.
- SQL – SQL server.
- Python3.
- JIRA (and Zephyr).
- SCRUM.
- GIT.
- Microsoft Excel.
- Power BI.
